(NEVADA STATE SONG)

By

Bertha Raffetto

Way out in the land of the setting sun
Where the wind blows wild and free
There's a lovely spot, the only one
That means home, sweet home to me.
If you follow the old Kit Carson trail,
Until desert meets the hills,
Oh you certainly will agree with me,
It's the place of a thousand thrills.

* * *

Whenever the sun at the close of day,
Colors all the western sky,
Oh my heart returns to the desert gray
And the mountains tow'ring high.
Where the moonbeams play in the shadowed glow,
With the spotted fawn and doe,
All the livelong night until morning light,
Is the loveliest place I know.

* * *

CHORUS -

"Home," means Nevada,
"Home," means the hills,
"Home," means the sage and the pines,
Out by the Truckee's silvery rills,
Out where the sun always shines,
There is the land that I love the best,
Fairer than all I can see.
Right in the heart of the golden west,
"Home," means Nevada to me.

CHAPTER I

INTRODUCTION

In undertaking a comprehensive study of the origin of place names in the State of Nevada, it was found that there was no record of the origin of a tremendous number of early and later names and that in many cases the reasons for names had been forgotten or had become vague even in the memories of surviving pioneers.

Place names fall into several groups, but first and foremost are those derived from natural features or phenomena of the area. A second group is composed of surnames or first names of pioneers, or of persons whom the newcomers desired to honor. In this class are the majority of county names, many of which perpetuate some early local leader or national figure. A third group of names commemorates historical incidents and a fourth consists of names taken over from the first inhabitants, the Indians. In a fifth group are the names of towns and stations established by the railroad companies and named by officials of the companies, frequently with little rhyme or reason beyond brevity. The sixth group, perhaps the most interesting, is made up of miscellaneous names bestowed by miners. Why the places were so named is often obscure, but it is strikingly noticeable that many of the names have connotations of beauty and poetry quite alien to the rough and ready camps in which the place namers were living.

NEVADA: "The Silver State" lies in the western part of the Great Basin, which is formed by the Rocky Mountains and the Sierra Nevada, which rims the western edge. While the state as a whole has a central position between the Canadian and Mexican borders, the sharp southeastern triangle juts down to bring one corner much nearer to Mexico. The state is bounded by Oregon and Idaho on the north, Utah and northern Arizona on the east, Arizona and California on the south, and California on the west. About half the boundary between Arizona and Nevada is determined by the Colorado River.

What is now the State of Nevada was formerly part of the territory of Mexico; after the land was ceded to the United States it became part of the Provisional State of Deseret, whose capital was Salt Lake City. It was included in the Territory of Utah, established by the United States government on January 17, 1854. Part of it became the Territory of Nevada on March 2, 1861, and the State of Nevada on October 31, 1864. The area was expanded twice and present boundaries were fixed in 1874.

Introduction

ORIGIN OF THE STATE NAME: In 1858, delegate James M. Crane, selected by the people of Carson County, Utah Territory, presented a bill for the organization of "Sierra Nevada Territory. In February 1858, the bill reached the house committee on territories, where the name was changed to NEVADA, although that bill was dropped. The name NEVADA is Spanish in origin and means "covered with snow" or "snow-clad."

ALTITUDE: Average mean elevation of the State is 5,500 feet above sea level. The lowest point is 470 feet above sea level at the southeastern boundary on the Colorado River. The highest point is Boundary Peak, 13,145 feet, in the White Mountains, in Esmeralda County.

POPULATION: 1940 - 110, 540.

AREA: Sixth state in size, 110,540 square miles, 738 of it under water; extreme length 485 miles and extreme width 315.

FIRST PERMANENT SETTLEMENT: Summer Station, 1848; Mormon Station, later Genoa, Douglas County; permanent in 1849.

STATE CAPITAL: Carson City.

STATE SEAL: The Nevada compiled laws of 1929, section 7,610, describe the state seal as follows: "In the foreground, two large mountains, at the base of which, on the right, there shall be located a quartz mill, and on the left a tunnel penetrating the silver leads of the mountain, with a miner running out a carload of ore, and a team loaded with ore for the mill. Immediately in the foreground there shall be emblems indicative of the agricultural resources of the state, as follows: A plow, a sheaf, and a sickle. In the middle ground, a train of railroad cars, passing a mountain gorge; also a telegraph line extending along the line of the railroad. In the extreme background, a range of snow-clad mountains, with the rising sun in the east. Thirty-six stars to encircle the whole group. In an outer circle, the words, 'The Great Seal of the State of Nevada', to be engraven with these words, for the motto of our state, 'All For Our Country'."

STATE FLAG: The flag is described under section 7,020 by an act approved March 26, 1929, which superseded all former acts concerning it. The law states: "The official flag of the State of Nevada is hereby created, to be designed of the following colors, with the following lettering and devices thereon, to wit: The body of the flag shall be of solid cobalt blue. On the field in the upper left quarter thereof shall be two sprays of sagebrush with the stems crossed at the bottom to form a half-wreath. Within the sprays a five-pointed star with one point up. The word "Nevada" shall also be inscribed within the sprays, and shall be inscribed in the same style letters as the words, 'Battle Born' and shall be inscribed in the following manner: Beginning at the upper point shall appear the letter 'N'. The other letters shall appear equally spaced between the points of the star. Above the wreath, and touching the tips thereof, a scroll bearing the words 'Battle Born'; the scroll to be golden yellow, and the lettering thereon black-colored Roman capital letters. The design upon which this bill is drafted shall be known as 'Design C' sketched by 'Don Louis Schellback 3rd, as redesigned to include the word 'Nevada' as provided for in this act."

STATE FLOWER: Sagebrush, or *Artemisia Tridentata*, by common consent.

STATE BIRD: Mountain bluebird, by common consent.

STATE SONG: "Home Means Nevada," written by Bertha Raffetto, and adopted as the State song by an act approved February 6, 1933.

NAME ORIGIN OF NEVADA COUNTIES

CHURCHILL COUNTY: Created Nov. 25, 1861, by the legislature of Nevada Territory, which organized the first nine counties. The boundaries have undergone various changes. The name was derived from Fort Churchill, which was named for Captain Charles C. Churchill. In 1940 the county had a population of 5,307, and contains 5,091 square miles, of which 42 square miles are under water. The act creating Churchill County placed the county seat at Bucklands, near Fort Churchill, but under authority of an act of February 19, 1864, Governor Nye, on April 2, 1864, placed it temporarily at La Plata until a site could be chosen by popular vote. In 1868 Stillwater became the seat; on January 1, 1904, the seat was moved to Fallon, where it now is, under authority of an act approved March 5, 1903. The county is in west central Nevada, and is bounded by Pershing County on the north, Lander County on the east, Mineral, Lyon, and Nye Counties on the south, and Washoe County and Lyon County on the west.

CLARK COUNTY: Created February 5, 1908, from the southern part of Lincoln County, it was named for Senator William A. Clark of Montana, builder of the San Pedro, Los Angeles, and Salt Lake Railway. Las Vegas was made the county seat under the act which established the county. This southernmost county in the State is bounded on the west by Nye County and the State of California, on the north by Lincoln County, on the east and south by the State of Arizona and the Colorado River, the Colorado forming the greater part of this boundary. The county has an area of 8,045 square miles, 150 of which are under water (Lake Mead), and a population in 1940 of 16,358, which makes it second most populous in the State.

DOUGLAS COUNTY: Created November 25, 1861, as one of the first nine counties formed after the Territory of Nevada was separated from the Utah Territory. Named for Stephen A. Douglas, nationally known political figure and opponent of Abraham Lincoln. In 1940 the county had a population of 2,046 and the area was 763 square miles, 30 of them under water (Lake Tahoe). The first county seat was at Genoa, but following the act of March 15, 1915, the seat was moved to Minden on January 1, 1916. The county is in the western part of the State, is bounded on the north by Ormsby and Lyon Counties, on the east by Lyon county, the south by the State of California, and the west by Lake Tahoe, in which lies the point of convergence if the western and southwestern boundary line of Nevada.

ELKO COUNTY: Created under authority of an act of March 5, 1869, the boundary lines were again defined on March 1, 1871. The county seat was established at Elko, where it still is. With an area of 17,128 square miles, 69 of which are under water, the county is the second largest in the State. In 1940 the population was 10,857. The name according to James G. Scrugham, originated with the Indians, and means 'first white woman.' It was here, according to the very old Indians, that they first saw a white woman. The county is bounded on the north by the State of Idaho, on the east by the State of Utah, south by Lander, White Pine, and Eureka counties, and west by Eureka and Humboldt Counties.

ESMERALDA COUNTY: Created under the act of November 25, 1861. The boundaries were later changed under acts of 1869, 1875, 1883, 1911, and 1913. In 1940 the population was 1,475 and the area 3,541 square miles. The county seats were created and changed as follows: Aurora, November 25, 1861, seat moved to Hawthorne July 1, 1883, and to Goldfield May 1, 1907, where it remains. Esmeralda means 'emerald' and was originally applied to a mining district by J. M. Corey, who explored this area. Mr. Corey, it is said, probably had in mind some early beauty who answered to that musical word, as it was a common name for girls with green eyes. The county is located on the southwestern border of the State, is bounded on the northwest by Mineral County, the northeast and east by Nye County and the southwest by State of California.

EUREKA COUNTY: Created March 1, 1873, by the legislature of Nevada. It, too, had various boundary changes, beginning with an act to define the boundary lines passed over the governor's veto February 16, 1875, a further act

February 7, 1877, and another March 2, 1881. The county seat was established at the town of Eureka in the act creating the county, and still remains there. In 1940 the population was 1,362, the area 4,157 square miles. The name originated with the discoverers, A. N. Arnold, Moses Wilson, J. W. Storr, and W. R. and C. T. Tannehill, who found silver-lead ore by roasting some rock. One of them shouted "Eureka," meaning 'I have found it'. The name was used for the camp and was given to the county when it was organized. Located in Central Nevada, the county is bounded on the north by Elko County, on the east by Elko and White Pine counties, on the south by Nye County, and on the west by Lander County.

HUMBOLDT COUNTY: Created under the act of November 25, 1861. A further act was approved March 7, 1873. The county seat was established at Unionville (now Pershing County) under the act creating the county. May 1, 1873, the seat was moved to Winnemucca, under authority of the act of February 14, 1873, where it still is. It has an area of 9,804 square miles. In 1940 it had a population of 4,749. The name Humboldt was first applied to the river by John C. Fremont, in honor of the noted scientist, Alexander Von Humboldt. The county in turn derived its name from the river. Humboldt County is located in the northwestern part of Nevada and is bounded on the north by the State of Oregon, on the east by Elko and Lander counties, Pershing and Lander counties on the south, and Washoe County on the west.

LANDER COUNTY: Created under an act approved December 19, 1862, and boundary changes were made on February 20, 1864, March 1, 1866, March 5, 1869, and March 7, 1873. The county seat was to be decided by the legal voters at a general election to be held the first Wednesday in September 1863. Meanwhile Jacobs Springs (Jacobsville) was the temporary seat. The election made Austin the permanent county seat. The county has an area of 5,721 square miles, and the population in 1940 was 1,747. It was named in honor of General Frederick W. Lander, mentioned in the history of the Indian War of 1860, who was in charge of construction, by the U. S. Government, of a wagon road across Nevada. The county is in central Nevada, is bounded on the north by Elko and Humboldt counties, east by Eureka County, south by Nye, and west by Churchill, Humboldt, and Pershing counties.

LINCOLN COUNTY: Created by an act approved February 25, 1866, supplemented March 18, 1867, the boundaries were changed February 20, 1875, and again in February 5, 1909. Crystal Springs was the first county seat, but an amendatory act approved March 18, 1867, located the seat at Hiko. It remained there until February 24, 1871, when it was moved to Pioche, the present seat. The county has a total area of 10,515 square miles, only 4 of them under water. In 1940 the population was 4,125. The county was named in honor of Abraham Lincoln. It lies on the eastern border of the State, is bounded on the north by Nye and White Pine counties, on the east by the States of Utah and Arizona, south by Clark County, and west by Nye County.

LYON COUNTY : Created by the act of November 25, 1861. Boundary changes were made February 20, 1864, March 1, 1883, March 6, 1889 and March 28, 1933. The first county seat was at Dayton, but a later act approved February 9, 1911, the county seat was moved to Yerington. The change was made May 1, 1911. The area is 1,523 square miles. The population in 1940 was 4,149. The county was named in honor of General Nathaniel Lyon, who fell in the battle of Wilson's Creek, near Springfield, Missouri. The county lies in West Central Nevada, bounded on the north by Churchill and Storey counties, on the east by Churchill and Mineral counties, south by Mineral County and the State of California, and west by Douglas, Ormsby, Storey, and Washoe counties.

MINERAL COUNTY: Created from part of Esmeralda County, by and an act approved February 10, 1911. The same act designated Hawthorne as the county seat, where it still remains. The area is 4,002 square miles, of which 125 are under water (Walker Lake). In 1940 the population was 2,332. The county is highly a mineralized area, and as such is appropriately named 'Mineral.' Located on the southwestern border, it is bounded on the north by Churchill County, the east by Nye and Esmeralda counties, the south by the State of California, and the west by Lyon County.

NYE COUNTY: Created by an act approved February 15, 1864. Numerous changes occurred under acts approved March 9, 1865, March 1, 1866, March 5, 1869, February 20, 1875, February 26, 1875, and March 24, 1913. It contains 18,294 square miles, and is said to be the second largest county in the United States. Ione City was the first county seat, but an act approved February 6, 1867, moved it to Belmont. A subsequent act made Tonopah the county seat on and after May 1, 1905. In 1940 the population was 3,588. The county was named in honor of James W. Nye, Governor of Nevada Territory at the time of creation. Located in south central Nevada, Nye County is bounded on the north by Mineral, Churchill, Lander, Eureka, and White Pine counties, east by Lincoln and Clark counties, south by the State of California, and west by Esmeralda and Mineral counties.

ORMSBY COUNTY: Created November 25, 1861, and Carson City designated as the county seat at the same time. It is the smallest county in the State, with an area of 168 square miles, of which 12 are under water (Lake Tahoe). In 1940 the population was 3,206. The county was named in honor of Major William M. Ormsby, who came to the Territory in 1857, and who was later slain in battle with the Indians. Located in western Nevada, it is bounded on the north by Washoe, Storey, and Lyon counties, the east by Lyon County, the south by Douglas County, and the west by Lake Tahoe.

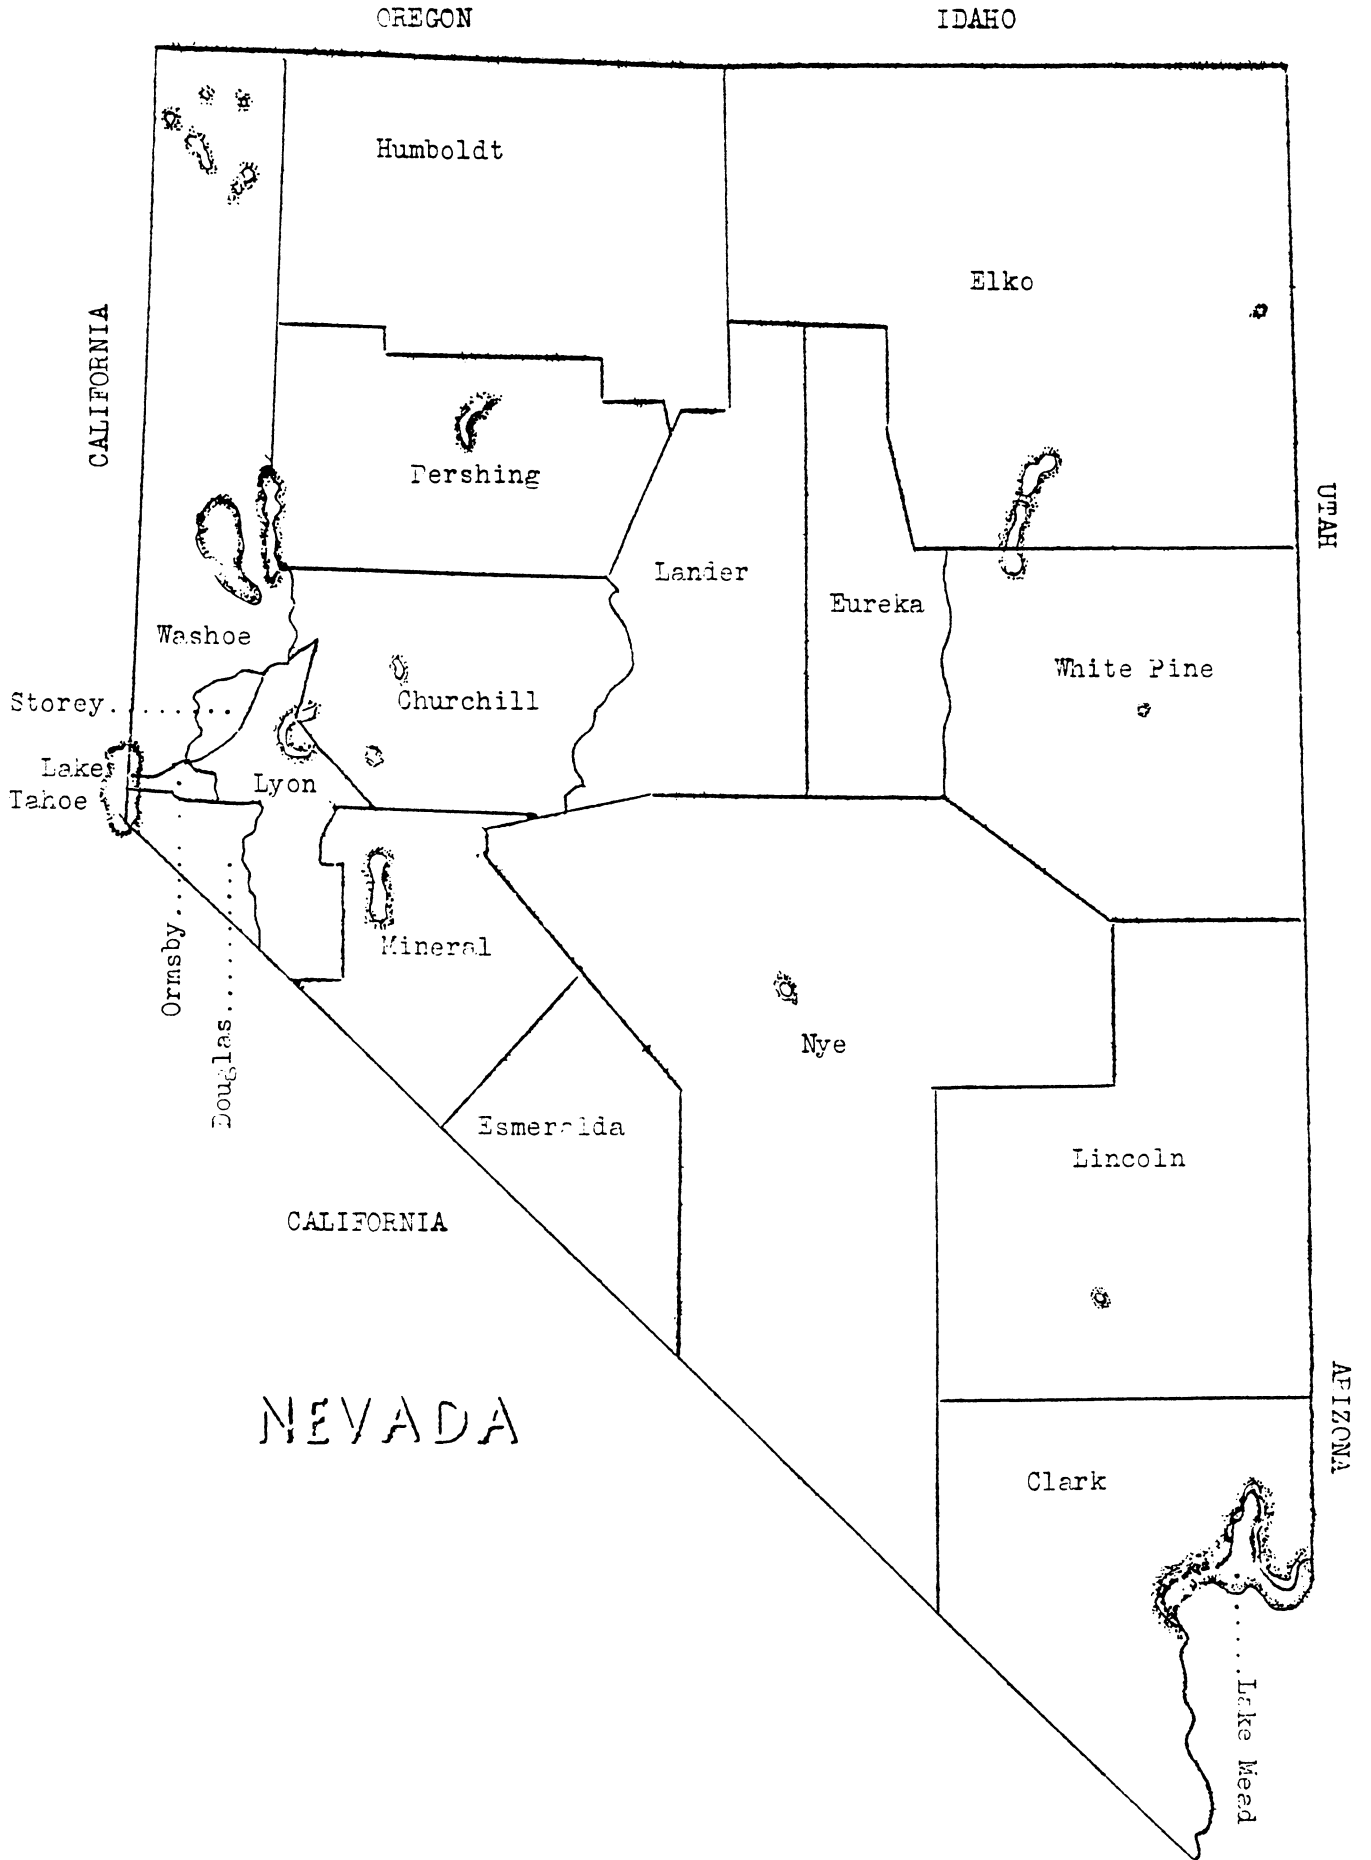

PERSHING COUNTY: Created March 18, 1919, from the southern part of Humboldt County, and named in honor of General John J. Pershing, Commander of the American Expeditionary Forces in France during the first World War. The county seat was established at Lovelock. In a total area of 6,021 square miles there are 76 under water. In 1940 the population was 2,778. It is in the northwestern quarter of the State, is bounded on the north by Humboldt County,

east by Lander County, south by Churchill County, and west by Washoe County.

STOREY COUNTY: Created under the act approved November 25, 1861, its boundaries have undergone no change since that time. The same act established the county seat at Virginia City. The area is 251 square miles. In 1940 the population was 1,218. The county was named for Edward Farris Storey, who was killed in an engagement with the Indians in 1860. Storey County is bounded on the north by Washoe County, the east by Lyon and Storey counties, and the west by Washoe County.

WASHOE COUNTY: Created November 25, 1861, by the legislature of Nevada Territory. Since that time it has absorbed what was then Lake County, later Roop County. The consolidation of Roop and Washoe counties was approved January 18, 1883. Lake County was named for Myron C. Lake of Lake's Crossing on the Truckee River, which subsequently became Reno. Roop County was named in honor of Isaac Roop, the accepted authority of a provisional government during the period between the functioning of Carson County, Utah Territory and the organization of Nevada Territory. The name Washoe comes from the Indian tribe found living in the surrounding country. Originally spelled Wassau, or Wassou, anglicized to Washoe, it means "tall bunchgrass," or "Ryegrass". The first county seat was established at Washoe City by the act creating the county. By the act of February 17, 1871 the seat was moved to Reno on April 3, 1871. Washoe County has a total area of 6,767 square miles, 516 of them under water, giving it the largest water area of any county in the State. Located on the northwestern border, it is bounded on the north by the State of Oregon, east by Humboldt, Pershing, Lyon, and Churchill counties, south by Storey and Ormsby counties, and west by the State of California. A portion of Lake Tahoe is in the extreme southwestern part of the county.

WHITE PINE COUNTY: Created under an act passed over the Governor's veto, March 2, 1869. Further changes occurred by approvals February 26, 1875, and March 2, 1881. The act creating the county established the county seat at Hamilton. By an act approved January 28, 1887, the county seat was changed to Ely on August 1, 1887. The total area of the county is 8,807 sq. mi., of which 12 are under water. In 1940 the county was third highest in population, with 12, 532 people. White Pine, according to early historians, was so named because of the heavy stand of timber of that species. The county is located in eastern Nevada, and is bounded on the north by Elko County, east by the State of Utah, south by Lincoln and Nye counties, and west by Eureka County.

The ensuing is a comprehensive list of Nevada nomenclature for present day towns with population of 10 or over, active mining districts, peaks, mountain ranges, lakes, and rivers. The following symbols have been used: alt. -altitude; pop. -population; c. circa (about), probable date settled; # -the conclusion seems obvious, but has not been taken from an authoritative source.

CHAPTER II
CHURCHILL COUNTY

ALPINE: (ǎl' pīn)³⁶ A mining district organized in 1864, ¹⁶ north of Eastgate, ²⁸ named for Clan Alpine Range. ¹²

(AUGUSTA: (ô gŭst' à) ³⁶ A mountain range in the southeast corner near the Pershing and Lander County line, properly in Lander County. ¹²

BELL MOUNTAIN: (bĕl moun' tīn) ³⁶ A mining district 43 mi. southeast of Fallon, ³⁴ probably named for Charles Bell, prospector of the district. ¹⁶

BERNICE: (bĕr nĕs') ³⁶ A mining district on the east side of Dixie Valley, ¹⁶ 60 mi. northeast of Fallon. ³⁴ #So named for a miner's sweetheart.

BOLIVIA: (bō liv' iā) ³⁶ A mining district east of Stillwater Range, ¹⁶ near the Pershing County line, north of Boyer and the Humboldt Salt Marsh. ³⁹

BOYER: (bōi ěr') ³⁶ A mining district about or near Table Mountain. ³⁹ Named for Alva Boyer, ⁶¹ the discoverer of copper ore on Table Mountain. ¹⁶

BROKEN HILLS: (brō' kĕn hīlz) ³⁶ A mining district ¹⁶ between Fairview and Ellsworth ranges ³⁷ in southeastern Churchill County, extending into Nye County, discovered 1931. ¹⁶ #So named for the character of the surrounding district.

BROWNS: (bronz) ³⁶ A mining district on the Pershing County border. ¹⁶ Named for Brown's Station, which was named for the proprietor in 1870. ¹²

CARROLL: (kār ũl') ³⁶ A mining district, T. 16 N. R. 38 E., ²⁴ and a summit. Alt. 7,452 ³⁸ on the boundary line between Lander and Churchill counties. ³⁷

CARSON: (kār s' n) ³⁶ A river ⁴¹ formerly emptying into Carson Lake, now into Lahontan Reservoir; ³⁹ a range, a local name for part of the Stillwater Range; a lake south of Fallon; a sink north of Fallon, east of Parran; a slough connecting the Humboldt and Carson sinks. ²¹ Lieutenant John C. Fremont named it for his guide, "Kit" Carson. ²¹ The other features were named for the river. ¹²

CHALK MOUNTAIN: (chōk moun' tīn) ³⁶ A mining district in T. 17 N., R. 34 E., ²⁴ named for the geological and mineral character of the hill. ²⁴

CLAN ALPINE: (klān āl' pīn)³⁶ A mountain range in the eastern part of the county,³⁷ named from an early mining district, which in turn was named Scotch clan.¹⁶

COPPER KETTLE: (kōp'ēr kēt'l)³⁶ A mining district, the main metal copper,¹⁶ located in Copper Kettle or Grimes Canyon on the west slope of the Stillwater Range, discovered in 1908, and named for the canyon.¹⁶

COPPER VALLEY: (kōp'ēr vāl'ī)³⁶ A mining district on the west slope of the Trinity Range.¹⁶

COTTONWOOD CANYON: (kōt'n wōd kān yūn)³⁶ A mining district in the north-eastern part of the county,¹⁶ 44 mi. from Boyer's Ranch.³⁹ Discovered 1861 and named for the characteristic tree.²¹

DESATOYA: (dēs ā toy'ā)³⁶ A mountain range running through three counties. (see Lander and Nye.) It forms the southeast boundary between Churchill and Lander counties.³⁹ Students first thought this a corruption of the Spanish "desatollar" - "to get out of the mud," but it seems more likely a Paiute word, meaning "big black mountain."¹⁰

DESERT: (dēz'ert)³⁶ A mining district on Soda Flat, west of Parran,¹⁶ a range in the southwest corner of the county,³⁹ and a peak, alt. 5,401, in the Hot Springs Range west of Soda Flat.³⁹ Named from the character of the country.¹²

DIXIE MARSH: (dīk'sī mārsh)³⁶ A mining district east of Stillwater Range in the northeastern part of the county, organized in 1861 and active until 1868.¹⁶ A favorite name used by Southern sympathizers.

DIXIE VALLEY: (vāl'ī)³⁶ A town, pop. 49;²⁸ alt. 3,500;²⁸ settled in 1861,¹⁶ in the north end of Dixie Valley, 40 mi.³⁷ north of US 50⁴² and a valley the northern extension of Fairview Valley.¹⁶

DRY LAKE: (drī lāk)³⁶ Between Clan Alpine Mountains and New Pass Range in the eastern part of the county.⁴² Named because of the scarcity of water in the lake most of the year.¹²

EAGLE MARSH: (ē'g'l mārsh)³⁶ A mining district on the old line of the Central Pacific in northwest Churchill County.³⁸ B. F. Leete established a salt works there in 1871.¹⁶ Named for an eagle's nest found there.²¹

EAGLE ROCK: (ē'g'l rōk)³⁶ A mountain peak east of and near Leete, west of Hot Springs Ranch.³⁷ #So named for an eagle or eagle's nest in the vicinity.²¹

EAGLEVILLE: (ē'g'l vil)³⁶ A mining district 64 mi. southwest from Fallon, organized 1905.¹⁶ #So named for an eagle found in the vicinity.²¹

EASTGATE: (ēst gat)³⁶ Pop. 10.²⁸ A town and mining district on the west slope of the Desatoya Range near the Lander County line.¹⁶ The mountains come close together to form a pass into the valley, for which the town is named.

EDWARDS CREEK: (ěd wěrdz krěk)³⁶ A valley between the Clan Alpine Mountains and New Pass in the eastern part of the county.²¹ #So named for a man living there.

FAIRVIEW: (fâr vū)³⁶ A town 42 miles east southeast of Fallon, alt., 4,600;¹⁶ a mining district on the west slope of Fairview Peak; a peak in the south end of the Clan Alpine Range overlooking Fairview Valley, alt., 8,250³⁹ a valley south of Dixie Valley between Sand Springs Range and the south end of Clan Alpine Range.³⁹ The town and district took their names from the peak and valley which were in turn named for the view.¹²

FALLON: (fāl ōn) A town, alt. 3,970;³⁷ pop., 1,905;³¹ the county seat of Churchill County and the end of Southern Pacific branch railroad from Hazen, on US 50;³⁷ a valley, that part of Lahontan Valley close to Fallon;²⁴ a mining district.¹⁶ The town was established on "Mike" Fallon's ranch in 1896 and was named in his honor.⁷

GOLD BASIN: (gōld Bā'sin)³⁶ A mining district in the converging corners of Churchill, Mineral, and Nye counties, ³⁴ alt., 7, 120;³⁷ 45 mi. southeast of Fallon.³⁴ Named for the ore of the district.¹⁶

HAZEN: (hā'zen)³⁶ A town, pop. 129;³¹ alt., 4,014;³⁷ on the Southern Pacific Railroad 23 mi.⁴⁴ Settled c. 1869. Named by officials of the road for a United States army major general, William Babcock Hazen, aide to General Sherman.²¹

HOLY CROSS: (hō'lı krōs)³⁶ A mining district on the Mineral County border,¹⁶ 12 mi. southwest of Schurz.³⁴

HOT SPRINGS: (hōt springz)³⁶ A mining district sometimes known as Eagleville¹⁶ (see Eagleville).

HOT SPRINGS MARSH: (mārsh)³⁶ A mining district at Leete in the northwestern part of the county.¹⁶ Named for natural hot springs.¹⁶

HUMBOLDT: (hūm bōlt)³⁶ A lake into which the waters of the river empty;⁴⁰ a marsh the same as the sink that contains the lake;⁴⁰ the southern end of a range, between the Carson and Humboldt sinks;⁴² a slough in the desert about 29 mi. from Ragtown.²¹ All of these are named for the river which was in turn named by Lieutenant John C. Fremont in 1843-44 in honor of Baron Friedrich Heinrich Alexander von Humboldt, German Naturalist and statesman.¹

JESSUP: (jě sūp) A mining district in the northern part of the county in Trinity Range.³⁷ Discovered 1908.¹⁶

JOB PEAK: (jōb pēk)³⁶ A mountain peak, alt. 8,806;³⁹ in the Stillwater Range north of Table Mountain.³⁹ Named for Moses Job, owner of toll road crossing Stillwater Range.⁵⁶

LAHONTAN: (lä hōn'tän) A town, pop., 25;⁶⁹ at the reservoir;⁷ a lake or reservoir in southwest Churchill County, partly in Lyon County;²⁴ a valley from Fernley to Stillwater containing the Truckee-Carson Irrigation District.¹ Taken from the name given to the lake which filled a large part of the Great

Basin in ancient times. It was named after Baron Armand Louis LaHontan, a French soldier in North America during the French and Indian wars.⁵⁶

LAKE: (lāk)³⁶ A mining district in Churchill County to the east of Humboldt Lake.¹⁶ #So named for its proximity to Humboldt Sink.

LEETE: (lēt)³⁶ A mining district on the old line of the Central Pacific near the Lyon County line on US 40.³⁸ B. F. Leete settled in 1871 and established a salt works here.¹⁶ The district was named for him.²¹

LOWER CARSON LAKE: (lō ẽr kār's'n)³⁶ A lake in the Carson Sink, the end of Old River.³⁷ One of the divisions into which the Carson River splits.³⁷ Named for Kit Carson, the scout.⁴
